

Alex Morgan

AI Product Engineer

Berlin, Germany hello@example.com github.com/yourusername

PROFILE

AI engineer building evaluated LLM applications, retrieval systems, and dependable ML products. Experienced in connecting model behavior, backend reliability, evaluation, observability, and product experience.

EXPERIENCE

Senior AI Product Engineer · Northstar Systems

2023–Present

- Led a fictional support-copilot program with grounded retrieval, abstention, and human escalation.
- Established evaluation gates and operational dashboards for release decisions.

Machine Learning Engineer · Meridian Labs

2020–2023

- Built fictional computer-vision services and deployment workflows for quality inspection.
- Partnered with domain experts to define error costs and review thresholds.

SELECTED PROJECTS

Evaluated RAG Support Copilot

Hybrid retrieval, reranking, groundedness evaluation, cost-aware routing, and confidence-based human review.

Document Workflow Agents

Schema-constrained extraction, deterministic controls, approval traces, and failure-aware orchestration.

SKILLS

Python · TypeScript · FastAPI · PyTorch · LangGraph · pgvector · OpenTelemetry · AWS · evaluation design · MLOps

EDUCATION

MSc, Computer Science · Example University

2020
